SOURCE OF TRUTH

AI Engine

Liliana Wells
DBA ⭕ 9.5

- Employee Has Admin Access
- Employee Has Installed 2 High Risk Apps.

Uninstall third-party app(s)

John Carton
Software Engineer ⭕ 10.0

- Employee Has Exfiltrated Sensitive Corporate Files Via Browser Upload, SCP And USB

Uninstall third-party app(s)

Use Cases

Data and IP Leaks

Source code Exfiltration

Cloud Data Exfiltration

Identity Threats

Device Threats

SAAS Threats

Platform Benefits

- Anzenna serves as your single source of truth for all people security data

- Anzenna agentlessly identifies employees exfiltrating sensitive data, source code and IP.

- Anzenna AI's algorithms save security teams hours of cumbersome work.

- Anzenna identifies and predicts toxic combinations of Insider Risk that allow security teams to stay proactive

- No agents to install or manage, reducing time to value and internal resource commitment from months to minutes

- Anzenna supports single-click auto-remediation and workflows out of the box, optionally allowing teams to address security issues without manual intervention, thereby reducing response times and operational overhead.
